SKILLS

- C++, Python, C, JavaScript
- React & Flask
- SQL & Database Design
- LangChain & HuggingFace
- Gemini & Groq APIs
- SFML & Raylib
- Git & OOP
- AI/ML Integration

ACHIEVEMENTS

Authored an Urdu novel, "Kahi Ankahi"

Built & deployed 8+ independent full-scale software projects across web, AI & systems programming

PORTFOLIO

Student Developer • Builder • Storyteller

EDUCATION

Information Technology University (ITU), Lahore — BS, 2nd Year (Ongoing)

Garrison College for Boys — FSc Pre-Engineering (90%)

The City School — Matriculation (96%)

PROJECTS

CodeVision

Full-stack algorithm visualizer/debugger with step-by-step execution tracing across sorting, recursion, DP, graph, and tree algorithms; custom Python/C++ code tracer; Fehm, an AI logic coach. Built with React, Flask, Supabase, Gemini + Groq. Live and deployed.

Namal — Pakistan Court Management System

Team project (ITU Lahore); 2-phase database system modeling Pakistan's judicial system across 30+ tables, plus an NL2SQL chatbot built with LangChain/HuggingFace.

Impact Connect

AI-powered NGO discovery platform for Pakistan featuring Rahnuma, a Gemini-powered matching assistant.

Wizard Chess

Harry Potter-inspired chess game in C++ with Hogwarts-themed graphics and a self-built AI opponent (no chess engine libraries used).

Ludo

Full-featured Ludo game in C++/SFML with save/load functionality and a custom RuleEngine.

Text Editor

Vim-style modal text editor in C++, built with a custom string class (no STL strings).

Restaurant System

OOP-based restaurant management system in C++/Raylib.

Flappy Bird

From-scratch recreation of Flappy Bird in C.
